

PROFILE

Skilled and innovative technology leader with Fortune 500, small business, entrepreneurial, hospitality and gaming experience.

EXPERIENCE**FORTUNE BAY RESORT CASINO — TOWER, MINNESOTA**

IT director (2010–present), <http://www.fortunebay.com>

Responsible for the overall management and security of IT systems for gaming, hospitality management, sales, computer technology and telecommunications services and programs. Manage computer system analysis and design, database and network administration, systems programming, telecommunications systems, website development, social media and other IT applications while meeting all budgetary requirements, policy and planning responsibilities and payroll objectives. Provide effective leadership and personnel management to IT staff and contribute to the overall goals and mission of the Bois Forte Development Companies.

STUDIO 4 ENTERPRISES — SAINT PAUL, MINNESOTA**HIGH SCHOOL FOR RECORDING ARTS — SAINT PAUL, MINNESOTA & LOS ANGELES, CALIFORNIA**

Technology director (2003–2009), <http://www.studio-4.com> and <http://www.hsra.org>

Designed web-based student information management system for 200-student Minnesota charter high school founded by a former Prince protégé. Re-engineered entire technology infrastructure, including workstations, server, network and phone system. Created and implemented technology plan for Los Angeles expansion school and served as technology director for both schools.

NORTHWEST AIRLINES — EAGAN, MINNESOTA

Manager, line maintenance automation (2001–2003)

Senior technology specialist, fuel and corporate services (1996–2001)

Manager, general credit (1993–1996)

Senior collector, universal air travel plan (1992–1993)

New accounts clerk, freight credit (1991–1992)

As one of Northwest's youngest managers, supervised staff of seven credit clerks and was responsible for 17 general ledger accounts with balances up to \$25 million and annual billings of more than \$530 million. Designed executive reporting system for \$175 million receivables financing project, ensuring "AA" certificate rating and reduced cost of funds. After earning an MBA, named technology specialist for the Fuel department, which had responsibility for \$1 billion annual fuel expense. Transferred from Fuel to Technical Operations and was responsible for managing 95 servers and workstations worldwide. Built an aircraft maintenance intranet reporting system that resulted in annual budget savings of \$900,000.
